

ANKUSH SAMUNDRE

Sydney, NSW | ankushsamundre01@gmail.com | +61 0490335551 | [LinkedIn](#)

Motivated and detail-oriented Cybersecurity graduate student experienced in security operations, threat analysis, and network security fundamentals. Skilled in SIEM monitoring, incident triage, and vulnerability assessment, with hands-on exposure gained through industry training and academic projects. Passionate about advancing into a SOC Analyst role and building expertise in blue-team defense and incident response.

TECHNICAL SKILLS

- **Security Tools & Concepts** – SIEM (Splunk, QRadar), Firewalls, IDS/IPS, DLP, Wireshark, API Security
- **Network Security** – TCP/IP, DNS, HTTP/HTTPS, VPN, Network Traffic Analysis
- **Identity & Access Management** – IAM, RBAC (role-based access control)
- **Version Control & Collaboration** – Git, GitHub
- **Systems** – Windows & Linux Security Fundamentals, Endpoint Security
- **Cryptography & Forensics** – AES (manual cipher analysis), OSINT, Dark Web Intelligence
- **Programming & Data** – Python (scripting, automation, debugging), SQL
- **Core Skills** – Threat Hunting, Incident Detection & Escalation, Vulnerability Assessment, Risk Analysis, Clear Incident Reporting

PROFESSIONAL EXPERIENCE

Cybersecurity Trainee (Security Operations Exposure) | Traineeship **Oct 2022 – Apr 2024**
ICEICO Technologies Pvt. Ltd. | Mumbai, India

- Observed and assisted with SIEM-based security monitoring, including log review and alert analysis
- Gained hands-on exposure to firewalls, IDS/IPS, DLP systems, and enterprise security monitoring tools
- Assisted in phishing email analysis and identification of suspicious indicators
- Supported threat analysis and security incident observation alongside senior analysts
- Collaborated with the SOC team to understand escalation procedures and incident workflows

High-Tech Entrepreneurship Development Programme | Training **Aug 2022 – Oct 2022**
Cybersecurity & Database Recovery | Maharashtra Centre for Entrepreneurship Development | Maharashtra, India

- Gained hands-on exposure to cybersecurity fundamentals and digital forensics concepts
- Trained in data recovery techniques, security analysis, and cyber incident awareness

EDUCATION

University of Sydney – Master of Computer Science **Jul 2024 – Present**
Specialization – Cybersecurity | Sydney, Australia

RTM Nagpur University – Bachelor of Science, Information Technology **Completed Jun 2022**
Nagpur, India

PROJECTS

Cybersecurity Assignment – TLS Analysis, Exploitation & Firewall Design **2026**
University of Sydney | Python, Wireshark

- Conducted TLS handshake and traffic analysis using Wireshark to identify encryption behaviour and security gaps
- Investigated buffer overflow exploitation techniques and documented mitigation strategies
- Designed firewall rule sets and network segmentation controls, and analysed the Ticketmaster data breach as a vendor-risk case study

AES Manual Encryption Analysis | Cryptography **2026**
University of Sydney

- Performed manual round-by-round AES encryption calculations to build low-level understanding of block cipher cryptography

Smart Study Tracker | Python, Terminal Application **2026**
University of Sydney

- Built and debugged a terminal-based Python application from requirements through to a working, presentable final product
- Applied structured problem-solving and iterative testing to resolve logic and indentation errors

CERTIFICATIONS

- Introduction to Dark Web, Anonymity & Cryptocurrency – Tor routing, cybercrime analysis
- Certified Dark Web Analyst, Forensic Academy – dark web investigations, OSINT techniques
